

Time Times And Half.

Prophecy must meet certain criteria in order to qualify for the prophecy rule. For example there is a day year prophecy criteria.

Numbers 14:34: After the number of the days in which ye searched the land, even forty days, each day for a year, shall ye bear your iniquities, even forty years, and ye shall know my breach of promise.

In this verse, a relationship between day and year is clear, each day will equate to a literal year. For the forty days that Israel spied in Canaan in unbelief, they would be punished by wandering forty years in the desert.

Daniel's Usage of the Day Year Principle.

Criteria = Time, Times and Half a Time = Penalty or Reward

Here, if the time in Time, Times and Half a Time is 1 Year then the penalty or Reward is involved.

'---

Daniel 4:16, 25, 32.

16. Let his heart be changed from man's, and let a beast's heart be given unto him; and let seven times pass over him.

25 That they shall drive thee from men, and thy dwelling shall be with the beasts of the field, and they shall make thee to eat grass as oxen, and they shall wet thee with the dew of heaven, and seven times shall pass over thee, till thou know that the most High ruleth in the kingdom of men, and giveth it to whomsoever he will.

32 And they shall drive thee from men, and thy dwelling shall be with the beasts of the field: they shall make thee to eat grass as oxen, and seven times shall pass over thee, until thou know that the most High ruleth in the kingdom of men, and giveth it to whomsoever he will.

Here we are given some insight on how time is applied in the phrase "time, times and half a time".

This is indicative of how time is used in the phrase.

There is a 1 year penalty for each year of transgression or in some cases reward.

Time = 1 year. 7 times = 7 years transgression.

'---

Daniel 7:25.

And he shall speak great words against the most High, and shall wear out the saints of the most High, and think to change times and laws: and they shall be given into his hand until a time and times and the dividing of time.

Time = 1 year.

Strong's Concordance. iddan (id-dawn').

<H5732> a set time; technical a year :- time.

Time in this equation has a finite or technical value of 1 year. Time in this equation is trying to get to a value of 3 1/2 (some might argue 2 1/2). The definitions of the words used in equations are extremely important.

The relationship between Time in the formula and the time of the reward is 1 to 1.

'---

Daniel 12:7.

And I heard the man clothed in linen, which was upon the waters of the river, when he held up his right hand and his left hand unto heaven, and swore by him that liveth for ever that it shall be for a time, times, and an half; and when he shall have accomplished to scatter the power of the holy people, all these things shall be finished.

Time = 1 year.

Strong's Concordance. mo em(mo-ade).

<H4150> properly an appointment, i.e. a fixed time or season; specifically a festival; conventionally a year; by implication, an assembly (as convened for a definite purpose); technically the congregation; by extension, the place of meeting; also a signal (as appointed beforehand) :- appointed (sign, time), (place of, solemn) assembly, congregation, (set, solemn) feast, (appointed, due) season, solemn (-ity), synagogue, (set) time (appointed).

Time in this equation is a fixed time or season of 1 year. Time in this equation is trying to get to a value of 3 1/2 (some might argue 2 1/2). The definitions of the words used in equations are extremely important.

The relationship between Time in the formula and the time of the reward is 1 to 1.

'---

Revelation 12:6.

And the woman fled into the wilderness, where she hath a place prepared of God, that they should feed her there a thousand two hundred and threescore days.

1,260 days = 3 1/2 years = Time, times and half a time = length of time the woman was protected from the serpent.

The relationship between Time in the formula and the time of the reward is 1 to 1.

'---

Note:

Revelation 12:8, 9.

8. And prevailed not; neither was their place found any more in heaven.

9. And the great dragon was cast out, that old serpent, called the Devil, and Satan, which deceiveth the whole world: he was cast out into the earth, and his angels were cast out with him.

Shortly after this time Satan was cast down to the earth and he could no longer visit heaven and accuse the brethren, and he, Satan knew that he had a short time.

'---

Revelation 12:14.

And to the woman were given two wings of a great eagle, that she might fly into the wilderness, into her place, where she is nourished for a time, and times, and half a time, from the face of the serpent.

The woman was protected from the serpent for this length of time. (3 1/2 years through armagedon?).

Some believe that this time, times and half a time prophecy was incorrectly stated by the KJV bible; and was stated correctly by other bibles as time, time and half a time. The difference being the s on the word time. The opposition's argument goes on to imply that if the prophecy had been stated differently it would have taken on an entirely different meaning.

Thus making the prophecy imply a 2 1/2 year duration instead of a 3 1/2 year duration, if it were correctly stated. Nevertheless, the 1,260 day value for the value of Time in the equation, confirms the former. Furthermore, opponents believe that Time is not equal to 1 year, but rather, Time equals 1,000 years. This is despite the fact that the Strong's Concordance dictionary's definition states clearly that Time technically is 1 year or has a fixed value of 1 year. The definitions of the words used in equations are extremely important. One great fault with many people is the acceptance of only part of the Scriptures on a subject and the rejection of other passages that contradict their theory. "No doctrine founded upon a single verse of Scripture, contains the whole of the subject; so do not be dishonest, and wrest with Scripture, or, force a meaning into a passage, that is not clearly understood in the passage, or in parallel passages on the same subject."

This 1,000 year value of time they proclaim has two primary reasons. The first reason is because they believe that the bible says that a day is equal to a thousand years. The other reason is because the day year principle in prophecy says a day equals a year. Therefore, either or both of these principles will get you to where you want to go, which is 2,500 years in the future.

The place where my opponent wants to get to is using the times and dividing of time prophecy equation to explain the time span from Isreal being taken into captivity, and Isreal being declared a nation in 1948, which is 2,500 years. Therefore, time equals 1,000 years.

The problem is that all values for time do not fit the criterion for Daniel's time, times and a half equation, but only those values where time is equal to 2 1/2 or 3 1/2 years. This is because the word "iddan", has "a set time; technicaly 1 year" and most assuredly not much more than one year.
